

Speed Installation Services™

Description

Fully trained Beast Speed Technicians™, equipped with Cabling Installation Systems (CIS) are placed on your job site. These technicians can often be deployed on short notice. This service is ideal for contractors facing an installation schedule that has been compressed to unobtainable parameters or when their work load exceeds available staff. These highly trained technicians will install a significantly greater volume of rough-in cable in shorter periods of time than any 'normal' crew. They are available to work extended hours and weekends—whatever is required to get your job done on time.

Key Benefits

- Available on short notice! (based on availability)
- Crews utilize Beast CIS for maximum efficiency
- Never miss a stage installation deadline again
- Crews fully versed in all standards regulating twisted-pair and fiber cable rough-in installation
- When rough-in is complete, all cables are sorted and color-coded for quick identification during termination
- Cable usage is often significantly lower than project estimates
- Beast Speed Technicians™ are available for extended hours
- Pricing is "per cable" or project based. Call for details

The Speed Installation Services™ are possible due to the efficiencies created by Beast Cabling System CIS that includes The Beast Cable Management System™, The WireWolf Pathway Guide and Patch Panel Organizer™ and the Claw Anti-Twist and Tensile Pressure Equalizer™.
